

The Trail of Mysterious Underground

The Underground Routes of Lower Silesia fire the imagination of many people – not only keen treasure hunters, especially after the “Nazi gold train” story. These underground sights can be divided into two categories: the ones related to the extraction of natural resources and those related to the military technique. The extraction was possible thanks to the abundance of resources in the region and a proper land management. Many mines and addits have remained in a good condition until now and are available to visitors. What also captures the imagination, are the shafts visible on the old maps that are still being found in the region. The part of the underground trail related to the military technique is even more fascinating. The remains of the rough history of the region (connected to the landscape layout that enabled camouflage) are unusual types of defence structures. Bearing in mind that there are gaps in the documentation and in the historical account (quite understandably for this field), it comes as no surprise that exciting discoveries keep on happening here.

The Project is managed by the Lower Silesia Tourist Organisation.

Become the conqueror of the Mysterious Underground Trail

Collect 12 stamps from all the sites of the trail in order to receive “The Conqueror of the Mysterious Underground Trail Certificate”. For more information, go to www.szlakpodziemi.pl

THE TRAIL OF MYSTERIOUS UNDERGROUND

1
Geopark in Krobica „The route of the ancient ways of precious metals mining”
Krobica 90, 59-630 Mirsk, www.podziemna-wieza.pl

Geopark – this tourist and educational „Route of the ancient ways of precious metals mining” is an underground 350-metrelong passage through two addits and 13 posts alongside the 8-kilometrelong ground route. The visitors start in the exhibition vestibule and move on to the excavation of the 18th-century addit of St Leopold. Then, using the interfloor shaft, they get to the drift of St John (16th century) situated 10 metres higher. What you can see there, are the remains of the tin ore excavations.

2
Time Gates – Bramy Czasu
ul. Chełmońskiego 3, 58-500 Jelenia Góra, www.timegates.pl

Time Gates offers two equally interesting sightseeing formulas. Historical Route – 1,400 meters of underground tourist route, the longest accessible underground in the Karkonosze Mountains. Science Route – an amazing acoustic and visual experience. At Time Gates – Bramy Czasu you will also organize an amazing Birthday Party, where, in addition to experiments and an electric concert, unique nitrogen ice cream awaits the birthday boy or a girl and guests.

stamp

3
The „Project Arado” Underground Tourist Route
ul. Lubawska 1a, 58-400 Kamienna Góra, www.projektarado.pl

This is the only underground tourist attraction in Poland, where tourists take on the role of agents of Polish intelligence. This is not an ordinary tour. The guide, is a trained “Silent Unseen” (pol. “Cichociemny” – special agent)! The tourists’ task is to photographically document the object and steal the last secret of the Third Reich! Innovative light illumination, German sentries along the route and the largest collection of World War II militaria in the region.

stamp

4
Książ Underground
ul. Piastów Śląskich 1, 58-306 Wałbrzych, www.ksiaz.walbrzych.pl

Tunnels built during World War II by the German army and intended to serve as storage rooms. The compartments went as deep as 30 metres below the ground and the low temperature there enabled to keep the food fresh. Whereas during wars, they were used as shelters. The route is about 600 metres long and it is one of the most interesting ones in Poland. During the visit, you can hear sounds of the city from the past and sounds of the battle.

stamp

5
„Former Mine” Science and Art Centre
ul. Wysockiego 29, 58-304 Wałbrzych, www.starakopalnia.pl

„Former Mine” Science and Art Centre in Wałbrzych was opened in November 2014. Within both Polish and European areas, it is a unique complex of eleven revitalised buildings that used to be Wałbrzych coal mine „Julia”. In the city core of priority industrial Wałbrzych emerged an exceptional place clustering cultural and educational activities, events and exhibitions located on over 4,5 ha in total.

stamp

6
Walimskie Addits „Riese”
ul. 3-go Maja 26, 58-320 Walim, www.sztolnie.pl

In 1943, the Germans started construction works at a massive scale in the Owl Mountains region. Those works, never completed, were code-named „Riese” („The Giant”). Their remains constitute a number of buildings the purpose of which is shrouded in mystery. The 500-metrelong underground route for tourists has been enhanced with audio-visual effects referring to the World War II and the works related to drilling underground corridors.

stamp

7
Underground City Osówka
ul. Świerkowa 29 D, Sierpnica, 58-340 Głuszycza, www.osowka.pl

This military facility, code-named „Riese” was built in the Owl Mountains by the Third Reich in 1943-45. Visitors can see guardrooms, technical corridor and a massive hall with its original 10-metres-tall formworks dating back to the late 1944, as well as some overground buildings, e.g. casino – overground command centre, power station – foundations of the power station prototype, railway siding.

stamp

8
Srebrna Góra Fort
ul. Kręta 4, 57-215 Srebrna Góra, www.forty.pl

Fort Srebrna Góra is a unique sight in terms of European cultural heritage. At the time of its construction (1765-1777), it was one of the most modern forts of this kind in Europe. The fort is visited with a guide in a historical Prussian uniform. The whole complex consists of six forts and a few bastions. There used to be 151 fortress chambers (casemates) there, situated on three storeys.

stamp

9
Kłodzko Fortress
ul. Grodzisko 1, 57-300 Kłodzko, www.twierdza.klodzko.pl

Kłodzko Fortress has lived through the Silesian Wars (mid-18th century) and the Napoleonic campaign (1807). Not only is it a precious record of history, but also a special monument of the fortification engineering concept. Moreover, its location has, until now, constituted a real challenge for the conquerors. What makes the fortress so special, is a complex and unique system of underground corridors in Europe, colloquially called the underground maze.

10
Kłodzko – Underground Route
ul. Czeska, 57-300 Kłodzko, www.podziemia.klodzko.pl

The underground corridors and tunnels situated below the city were drilled between the 13th and 17th century and intended to serve as storage rooms. The compartments went as deep as 30 metres below the ground and the low temperature there enabled to keep the food fresh. Whereas during wars, they were used as shelters. The route is about 600 metres long and it is one of the most interesting ones in Poland. During the visit, you can hear sounds of the city from the past and sounds of the battle.

11
Złoty Stok – Gold Mine
ul. Złota 7, 57-250 Złoty Stok, www.kopalniazlota.pl

The Underground Tourist Route Gold Mine was created in 1996. Two extremely interesting addits were then made available for visitors: „Gertruda Addit”, „Czarna Górna Addit” with the only underground waterfall in Poland (8 metres high), and „Czarna Dolna Addit” which you can exit by the Orange Tram. The ancient Ochrowa drift was also made available for visitors. What makes people want to come back to the Gold Mine is the unique fairy tale ambiance of this underground world and an extraordinary way of guiding.

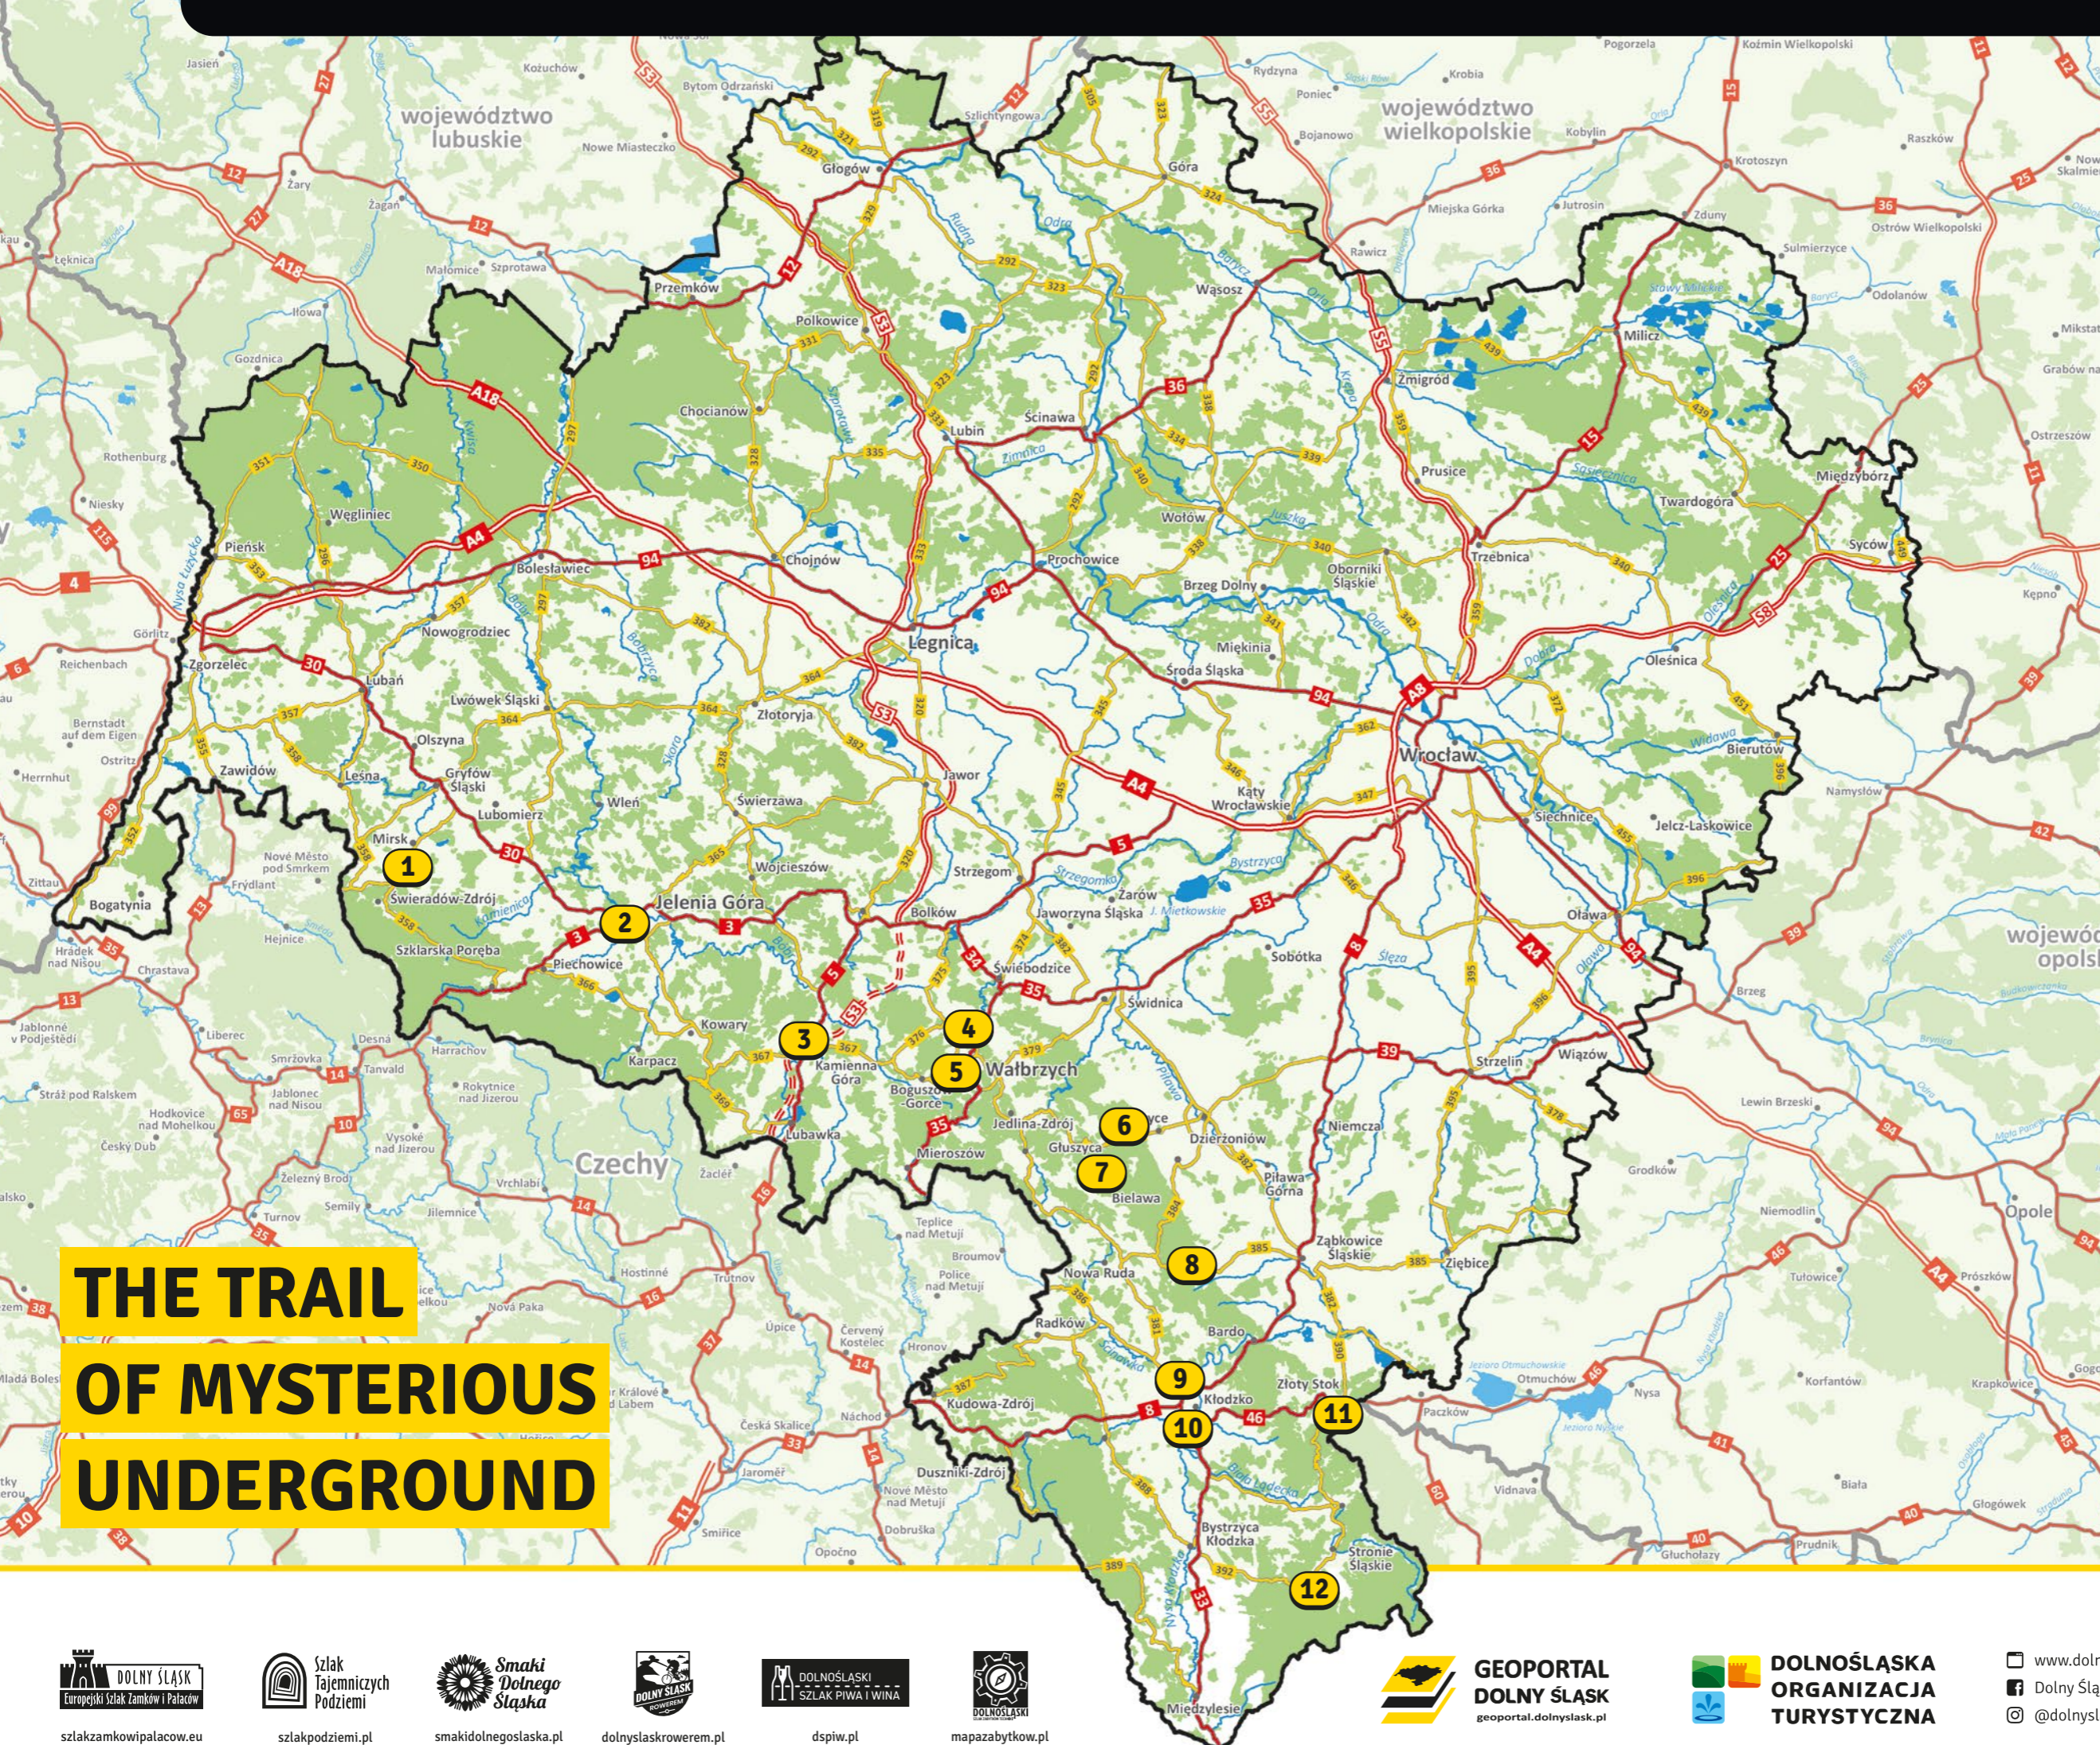

stamp

12
Uranium Mine in Kletno
Kletno 40, 57-550 Stronie Śląskie, www.kletno.pl

The Uranium Mine in Kletno is a magical place. Its claim to fame is the occurrence of colourful local minerals such as fluorspar, amethyst, malachite and barite. While walking through a maze of colourful corridors, the visitors have a chance to familiarise themselves with Kletno’s 600-year history of mining. Our special exhibition takes back in time for a prehistoric journey showing 500 million years of evolution based on the geological history of the Śnieżnik Mountains.
